

PROUDLY PRESENTS...

THE EMMI-PET ULTRASOUND SERVICE

When was the last time you removed all the bacteria in your dog's mouth? Are you concerned by bad breath and the thought of having your dog put under anesthetic at the vet? Well, the emmi-pet ultrasound service is made for you!

By three years old 80% of dogs will have some level of dental disease!

Regular oral care is the most effective way to prevent dental disease from forming. Prevention is better than cure!

This is not an easy job for most dog owners, but with the emmi-pet ultrasound service we can keep your pup's smile sparkling again and help maintain their dental health.

Regular Oral care can help prevent them having dental issues. This service supports the destruction of bacteria on the teeth, under the gumline and even into the gingival pockets.

PREVENT THIS

The silent toothbrush is stress free while **combatting plaque** and **tartar formation**, oral cavity diseases, **gingivitis**, periodontitis, and **bad breath**. It is also abrasion-free so does not hurt the enamel.
